

WHAT IS CLAIMED IS:

1. A computer system comprising:
a first storage system comprising a first disk controller, and one or more first disks coupled to said first disk controller;
a second storage system comprising a second disk controller, and one or more second disks coupled to said second disk controller; and
a controller coupled to said first storage system, said second storage system, and a host computer,
wherein said controller receives an I/O request issued from said host computer, and sends an I/O request to one of said first storage system and said second storage system based on a disk identification (ID) included in said I/O request issued from said host computer.
2. A computer system as claimed in claim 1,
wherein said I/O request issued from said host computer further includes a first address designates a storage area accessed by said host computer, and
wherein said controller converts said first address to a second address designating a storage area in one of said first storage system and said second storage system, and sends an I/O request including said second address to said one of said first storage system and said second storage system.
3. A computer system as claimed in claim 1, wherein said disk ID designates a disk recognized by said host computer.
